

Profile

Final-year B.Tech CSE student with hands-on experience in **DevOps, CI/CD pipelines, cloud deployment** (Render, Vercel, AWS), (**Docker**), and **Python scripting** for infrastructure automation. Proficient in AI/ML, Deep Learning, Computer Vision, and full-stack engineering. Oracle OCI certified (AI Foundations & Generative AI Professional). Seeking a Fresher DevOps Engineer role to build scalable, automated, and highly available production systems.

Education

B.Tech — Computer Science & Engineering

Eshan College of Engineering (AKTU), Agra

2022 – 2026

CGPA: 7.1/10

Class XII — Science (PCM)

University Model School Agra, CBSE

2022

67%

Professional Experience

Software Engineering Intern — 509 Army Base Workshop, Indian Army

Jun – Jul 2025

- Built an offline AI-powered **File Content Tracker** (Next.js + Electron + Ollama LLM) for intelligent semantic search across defence databases; applied **CI/CD with GitHub Actions**, containerised deployment, and Agile practices on a production environment under strict security constraints.
- Acted as business analyst — gathered requirements from defence stakeholders, translated them to technical specifications, and delivered a cross-platform production system end-to-end.

Projects

AI-Powered Crime Detection & Surveillance System

Python · FastAPI · TensorFlow/Keras · OpenCV · Scikit-Learn · React.js (Vite) · MongoDB · Render · Vercel · Pandas · Ollama · React-Leaflet

- **Deployed** a decoupled two-service architecture: **FastAPI** backend to **Render** (server, env variable management) and **React.js/Vite** frontend to **Vercel** — establishing a **Git-triggered CI/CD** workflow with automatic builds and zero-downtime rollouts on every `main` branch merge.
- **Engineered** a multi-threaded **Python** backend streaming live CCTV feeds via **OpenCV + TensorFlow/Keras** inference for real-time anomaly detection; implemented **Server-Sent Events (SSE)** in FastAPI to push sub-second alerts to the React dashboard without blocking the main event loop.
- **Automated** full data ingestion pipeline via **Python scripting** — Kaggle API fetch, **Pandas** cleaning, and **Geopy/OpenStreetMap** geocoding of 40+ cities; integrated **Scikit-Learn** Danger Rank model on React-Leaflet maps and an **LLM chatbot** (Ollama/OpenRouter) for natural-language crime queries.

Technical Skills

DevOps & Cloud: Docker, Kubernetes, AWS, GitHub Actions, Jenkins, Render, Vercel, Git

Languages & Scripting: Python (Expert), JavaScript/TypeScript, Java, SQL

AI / ML / DL: PyTorch, TensorFlow/Keras, Scikit-learn, OpenCV, Pandas, NumPy, YOLO, Ollama (LLM/VLM)

Frameworks & Databases: FastAPI, Flask, React.js, Next.js, Express.js, Electron.js, MongoDB, MySQL, PostgreSQL

Core Competencies: CI/CD Pipeline Design, Containerisation & Orchestration, Cloud Deployment, Scalable Architecture, DevOps, Agile

Achievements & Certifications

- **Oracle OCI Certified:** AI Foundations Associate · Generative AI Professional · Foundations Associate · Multicloud Architect Professional.
- **NPTEL Elite:** Speaking Effectively (IIT KGP) · Soft Skills (IIT Kanpur) · IoT (IIT KGP) · Emotional Intelligence (IIT KGP).
- Completed **McKinsey Forward Program**; Full Stack Dev Python — APTRON (84hrs); Software Engineering — Forage; Data Visualisation — Tata/Forage.
