sidd2004.sk@gmail.com | +91 9105830551 | Agra, India

Summary

GenAI & React.js Developer with hands-on experience building **LLM-integrated, full-stack web applications** – combining **RAG pipelines, LangChain, and prompt engineering** with **React.js, Next.js, and Vite** front-ends. Skilled in turning open-source LLMs (**Ollama**) into production-ready, real-time interfaces using **REST APIs and FAISS embeddings**. Experienced deploying via **Docker, CI/CD, AWS, Render, Vercel**. Oracle OCI certified in **AI Foundations & Generative AI**.

Education

B.Tech CSE — Eshan College of Engineering (AKTU)

2022–2026

Experience

GenAI Systems Intern — Indian Army (509 Base Workshop) (1 Year Experience) Jun 2025 – Present

- Built and continue to maintain an **offline GenAI document-intelligence system** using **Ollama** and **LangChain RAG** to retrieve, reason over, and summarise defence documents.
- Designed **multi-step LLM workflows** with vector-store and buffer memory, tool integration, and ReAct-style reasoning for accurate, grounded responses.
- Containerised and shipped the application with **Docker + GitHub Actions CI/CD** inside a secure, air-gapped, no-internet environment.

Projects

AI-Powered Crime Detection & Surveillance Dashboard

React.js • Vite • FastAPI • TensorFlow • OpenCV • Docker • CI/CD

- Built a **React.js (Vite)** front-end rendering a live, geocoded surveillance map across **40+ cities**, updated in real time.
- Integrated a **GenAI/CV detection pipeline** (TensorFlow, OpenCV) behind **FastAPI**, with CI/CD auto-deploying the front-end to **Vercel** and API to **Render**.

Offline GenAI Document Q&A Assistant

Next.js • Electron.js • LangChain • Ollama LLM • Docker

- Built a desktop **Next.js/Electron.js** app with a chat-style UI for querying local documents via a **locally-hosted Ollama LLM** – fully offline, no external API calls.
- Implemented a **RAG pipeline** (LangChain) with prompt chaining and multi-turn memory to ground LLM answers, with source-citation display in the UI.

Skills

GenAI/LLM: LangChain, LangGraph, CrewAI, RAG, Prompt Engineering, FAISS, Embeddings, LoRA/QLoRA

Frontend: React.js, Next.js, Vite, JavaScript/TypeScript, REST APIs

Backend/ML: Python, FastAPI, Node.js, PyTorch, TensorFlow, OpenCV, MongoDB, PostgreSQL

DevOps/Cloud: Docker, AWS, CI/CD, Render, Vercel

Certifications & Achievements

Achievement: Reliance Foundation Scholar (academic merit scholarship)

Oracle 2025 Certifications: Oracle Cloud Infrastructure 2025 Certified Generative AI Professional, Oracle Cloud Infrastructure 2025 Certified Multicloud Architect Professional, Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate, Oracle Cloud Infrastructure 2025 Certified Foundations Associate, and Oracle Data Platform 2025 Certified Foundations Associate

Job Simulations (Forage): Software Engineering Job Simulation by JPMorgan Chase & Co. and Data Visualisation Job Simulation by TATA

NPTEL Elite: Manufacturing Process Technology I & II from IIT Kanpur, IoT, Soft Skills, Patent Law for Engineers and Scientists, Introduction to Industry 4.0 and Industrial Internet of Things

Programs: McKinsey Forward Program
